

Excavator XD Package

XD Models

JS220
JS260
JS300
JS330
JS370

Why XD?

- Protects the investment (machine robustness and aesthetics)
- Protects vital machine components and reduces the wear and tear.
- Protects the operator from the risk of falling objects.

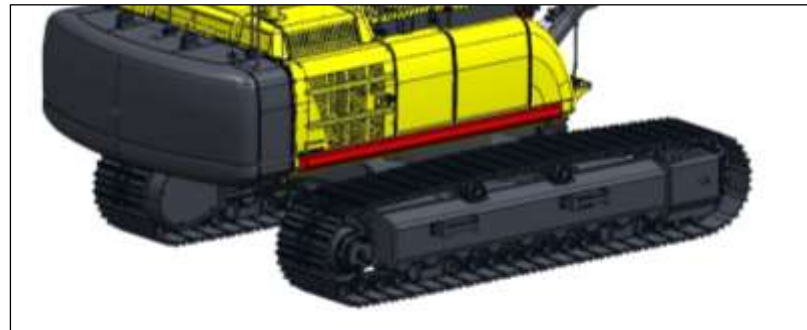

- Protects the operator from the risk of falling objects.
- The cage is platform mounted so can be easily replaced and does not immobilise the machine if damaged.
- Certified to FOPS Level 2.
- Designed to provide maximum protection with limited impact to visibility.

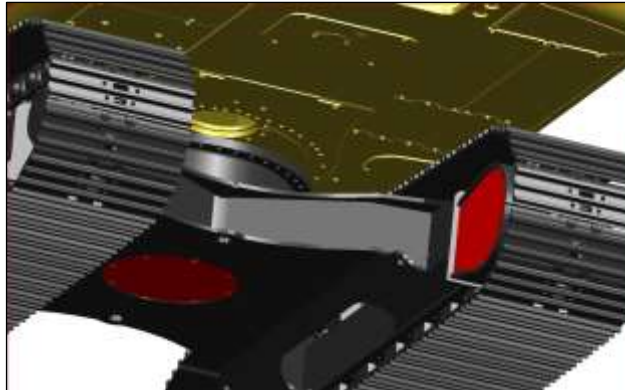

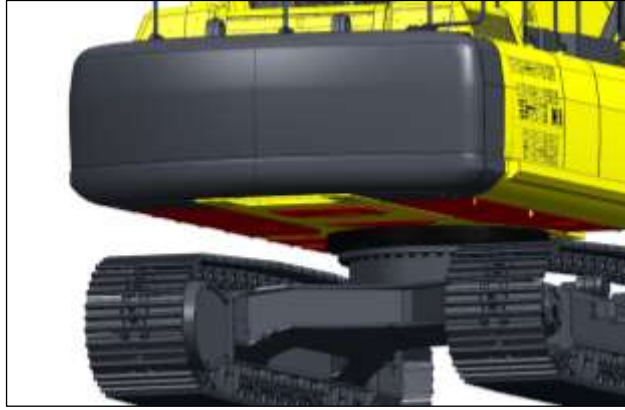

Side Impact Protection System (SIPS)

- Fitted down both sides of the machines upper structure.
- Provides protection to the fuel and hydraulic tanks, cooling pack and the hydraulic pump bags.
- Welded on for easy repair or replacement.

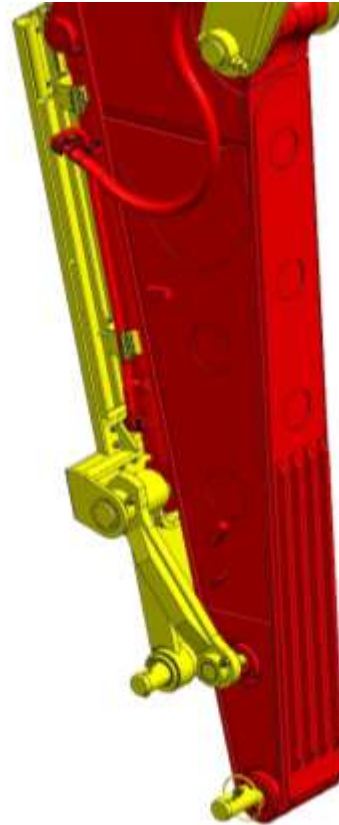

Under Belly Protection

- An increase of 400% in thickness from 2mm to 10mm.
- Protects vital machine components

- Extra plating added to the left hand, right hand and underside of the dipper (NB. Not on the JD220 XD).
- Wear strips added to the underside of the dipper.
- All contribute to the overall wear properties required in the arduous applications XD is sold into.

Extra Plating

Wear Strips

- Provides protection to the bucket ram cylinder and rod.
- A bolt on system that can be easily retrofitted.
- Wear pads on the slide mechanism which can be replaced for extended life.

- Provided as standard on the XD model, is an air pre cleaner that ensures the engine is provided continuously with clean, fresh air; essential in dusty demolition and re-handling environments.
- The JS220 is fitted with a scavenge system and the JS260, JS300, JS330, JS370 is fitted with a visibowl system.

Visibowl Air
Pre Cleaner

Scavenge
System

- To better protect the track chain of the machine when tracking in arduous conditions, full length track guides can be specified with the machine.
- The standard XD models will feature twin track guides only.
- Sales codes are available on the JS260 and JS370 for full length track guides. Other models need to be enquired via the sales special process.
