

**FOR THE NEW ELECTRIC TELETRUK**

JCB is leading the way in clean technology and reducing harmful emissions. E-TEC is a new generation of electric products with zero emissions at point of use that don't compromise on performance. The JCB 30-19E electric Teletruk is one of the new generation of innovative products that utilise electric technology to access a whole new world of possibilities.

# FOR GREATER INNOVATION

- Unique telescopic forward reach with a lift capacity of 1900 kg at 2m.
- Small footprint enables turning within its own axis through spin turn.
- Unrivalled 360-degree visibility.
- JCB patented Load Motion Control prevents forward tip.
- Industry-leading JCB LiveLink telematics system as standard.

With superb visibility, precision control and several unique design features, the electric Teletruk reaches new heights of safety, making all operators feel in total control within any environment and in any application.

# FOR GREATER SAFETY

- Unique Load Motion Control feature prevents forward tip for increased on-site safety.
- 360-degree field of vision around the machine and to the attachment.
- Unique 111 degrees of carriage rotation makes handling goods easier and safer.
- Single lever control for easier, safer operation.

The new JCB electric Teletruk is designed to make the most of your time and space. Its unique telescopic boom, small turning circle and single side loading ability allow it to do so much more work, both inside and out.

# FOR GREATER PRODUCTIVITY

- Save 70m<sup>2</sup> of space per truck with single side loading.
- Save 8 minutes opening and closing curtain time per truck load.
- Low 2.2m cab height allows loading and unloading inside containers and trailers.
- Full free lift of 1575mm as standard.
- Electric driveline enables climbing a 21% gradient or ramp with ease.

The JCB electric Teletruk has been designed and built for efficient 24/7 operation. Its unique telescopic boom saves you time, space and money while its battery can be changed quickly, making it the ideal choice for your constantly moving world.

# FOR GREATER EFFICIENCY

- 3 Euro-pallets can be van loaded easily and safely within 2 minutes.
- An integral part of the logistics 'final mile' distribution chain.
- Efficient 2-minute battery change.
- Work for a full 8-hour shift on a single charge.

JCB is leading the way in clean technology and reducing harmful emissions, especially in urban, air quality sensitive environments and enclosed spaces. The electric Teletruk is one of the new machines in the E-TEC range that utilises electric technology to access a whole new world of possibilities, while protecting the environment today and in the future.

# FOR GREATER SUSTAINABILITY

- Equally efficient indoors and outdoors, making it a great environmental choice.
- Zero emissions at point of use.
- Low noise pollution protects the hearing of operators and other workers.
- Real-time measurement of energy consumption via JCB's LiveLink telematics system.

The unique JCB electric Teletruk is the world's most versatile counterbalance lift truck and the new electric model makes it even more versatile. With forward reach allowing single side truck, van and container loading and with low height and small turning circle, indoor and outdoor applications are almost limitless.

# FOR GREATER VERSATILITY

- Van, truck, container and rail loading, supports all areas of logistics operations.
- Range of Teletruk attachments plus compatibility with industry standard ones.
- Sealed components under the cab makes all weather working possible.
- Unique forward reach for unlimited application versatility.

Whichever industry you work in, the JCB electric Teletruk with all its unique features, has the potential to add significant value to your business. It can free up space and let you store more in the same space, to increase your profitability. And of course, the electric Teletruk will easily and safely get more work done in a day.

# YOUR FULL POTENTIAL

- Realise increased productivity levels of up to 20%.
- Eliminate safety concerns of forward tip with JCB Load Motion Control.
- Designed for both indoor and outdoor working.
- Maximise uptime using JCB LiveLink telematics.
- Free up space and store more stock, to grow your business without the need to move premises.
